## The Hammar™ "Mega Transfer"

»SIDELOADERS WITH SUPERIOR LIFTING CAPACITY«

# Modern, effective and safe technology

...if HAMMAR is written on your sideloader, you are safe. Year after year.

## Hammar Maskin – a reliable company

Hammar Maskin is a reliable company which has always grown by its own means. This provides the company and its customers and suppliers with a sound financial base. They can feel safe in the knowledge that Hammar Maskin will continue to be a reliable partner. Thanks to its good solvency, Hammar Maskin has succeeded in obtaining the highest credit rating – AAA – from Dun & Bradstreet (Soliditet), for no less than 14 years, of which nine were consecutive.

HAMMAR Twinlock – an example of our patented technology.

## Why choose a HAMMAR?

**With almost 40 years in the industry, made to order and experience of customers' needs across the world, we dare to promise quality, safety and service.**

But why choose a sideloader instead of old-fashioned crane technology or fork-lift trucks? The answer is simple: time, safety and costs.

When a vehicle comes to the terminal with its container, unloading should start – vehicles standing around cost money. So why wait for a crane, truck or perhaps have to uncouple a trailer? With a HAMMAR the driver him or herself unloads the freight in a few minutes and is then able to drive away. This means that s/he does not need other people to unload a container from his or her vehicle.

We provide proven and reliable technology which rationalises container handling and makes it more effective, no matter where you wish to transfer or transport them. That is why we have over 70% of the world market. That is why you choose a HAMMAR.

HAMMAR companion truck and trailer

# An extremely stable and safe Sideloader

## H155

### Why choose the 155 Model?

The HAMMAR™ “Mega Transfer” is not just an excellent design when transferring containers to other vehicles, it also gives you an extremely stable and safe Sideloader for all your container handling.

### Specific advantages for the 155 model:

- The extended stabiliser does not need to be in contact with the companion vehicle.
- After unloading, the companion vehicle can drive away without any need to move the HAMMAR.
- Wide and high “tunnel” for the companion vehicle: 3200mm x 1700mm (105 inch x 56 inch)!
- Exceptional stability during loading and unloading due to the extreme outreach of the stabilisers.
- Possibility to support the stabilisers on top of the assisting vehicle, when folding them. The HAMMAR 155 is able support on a companion vehicle as low as 800 mm (26 inch).

To optimize your HAMMAR for your specific need of transportation you are also free to choose the standard 151 stabiliser on either the front or rear crane.

Of course you can still utilize all other options and extras for the HAMMAR 150 series.

“Wide and high “tunnel” for the companion vehicle: 3200mm x 1700mm (105 inch x 56 inch)!”

# Unrivalled flexibility, safety and capacity

**Extreme stability ▲**  
Extreme stability in all container handling.

**Stabiliser ►**  
Stabiliser to sit flat on a trailer as low as 800 mm.
